I just want to express my support for XM Satellite Radio and its new traffic and weather channels. I live in a rural area and don't directly benefit from the channels on an everyday basis, however, I feel very comfortable knowing that if I have to travel to one of the many cities covered I will immediately have the information at my fingertips about the local weather and traffic conditions. I have had my XM Radio less than a month but I am already an avid fan. I pay for the variety, quality and ABSENCE of continuous annoying advertising and talk I hear on local stations. I urge the FCC to reject NAB's petition 04-160.
